SUMMARY

Innovative mathematician with a background in machine learning, data, and analytics. Adept at communicating business concepts and technical ideas to a nontechnical audience. Seeking a position in data science/analytics at the interface of a collaborative scientific/technical group and an executive/management team.

EDUCATION

University of California, Irvine, Irvine, CA June 2025

Doctor of Philosophy in Mathematics

Thesis: Calculus and Convex Integration

[INCLUDE RELEVANT COURSEWORK HERE]

California Institute of Technology, Pasadena, CA June 2018

Bachelor of Science in Mathematics and Computer Science

Summa Cum Laude

PROFESSIONAL EXPERIENCE

University of California, Irvine, Department of Mathematics September 2020-Present

Teaching Associate

- Taught 4 mathematics classes to class sizes of 50-200 undergraduates, preparing all lecture notes
- Evaluated performance and provided feedback for up to 75 students per quarter
- Coached students individually resulting in increased comprehension of materials and improved performance
- Manage the development and responsibilities of 4 undergraduate research assistants

UCI Advanced Professional Degree Consulting Club, Member, Consultant January 2022 - Present

- Collaborate with a cross-disciplinary team of 4 graduate students to address clients' needs
- Provide data and analytical support to micro-consulting team, focusing on technical solutions
- Led 6-week case bootcamp for advanced degree candidate pursuing management consulting

Five Rings Capital, Research Intern June – September 2016

- Developed and improved proprietary predictive models for short-term systematic trading
- Simulated and analyzed risk models to effectively manage portfolio and instrument risk
- Mined and cleaned large data sets to further the fund's expansion into new markets
- Engineered production software that interfaced with exchanges worldwide

Department of Defense - Center for Communications Research, Research Staff September 2018 – May 2019

- Consulting member of staff of 12 research mathematicians
- Developed new algorithms and production software for solving cryptologic problems

SELECTED HONORS AND AWARDS

- National Defense Graduate Science and Engineering Fellowship 2012 - 2016
  One of 13 graduate mathematics fellowships awarded by the Dept. of Defense in 2012
- Barry Goldwater National Math and Science Scholarship 2007

RELEVANT SKILLS

- Data Analysis: R, Python, STATA, MATLAB, SQL, Java
- Languages: Mandarin, French
