Peter Anteater

peter.a@uci.edu Irvine, CA
LinkedIn Profile 949-222-2222

SUMMARY

- 7 years research experience focused on particle physics with expertise in experimental design
- Proficient in computer modeling of subatomic elements, equipment and software testing, and quantitative analysis
- Experienced in partnering and collaborating with academic and industry groups to bridge the gap between research and application

EDUCATION

University of California, Irvine Irvine, CA
Ph.D., Physics Expected 2026
Thesis: Dissertation Name

- National Science Foundation Graduate Research Fellowship recipient

University of California, Berkeley Berkeley, CA
M.S., Physics June 2018
Thesis: Name of Thesis Project

Stanford University Palo Alto, CA
B.S., Physics, *summe cum laude*, GPA. 3.9 June 2016

RESEARCH EXPERIENCE

University of California, Irvine Irvine, CA
Ph.D. Researcher September 2020- Present

- Investigate fluctuations in specific crystals and analyze data in MatLab
- Use microscopy to study structure and dynamics of various systems
- Discovered novel structure of gels formed by oppositely charged particles
- Presented results to 100 attendees at annual FEM conference

University of California, Berkeley Berkeley, CA
Research Assistant August 2016- May 2018

- Prepared paramagnetic salts and characterized hydrostaticity for ultra-high-pressure physics
- Conducted extensive data analysis via MatLab
- Interpreted technical material for non-technical audience at UC-wide conference

Stanford University Palo Alto, CA
Summer Undergraduate Research Program June 2014- August 2014

- Studied relationship between knot theory and quantum field theory
- Computed values of various figure-eight knots and presented results to SURF professors and staff

TEACHING EXPERIENCE

University of California, Irvine Irvine, CA
Teaching Assistant September 2021- Present

- Assisted in teaching courses in physical sciences for class sizes ranging from 50-200 students.
- Developed course material for laboratory and small group tutoring
- Evaluated performance and provided feedback for 50 students per quarter.
- Coached students individually, resulting in increased comprehension of materials and improved performance

SKILLS

- Computer: R, Python, STATA, MATLAB
- Imaging: Confocal microscopy, fluorescent microscopy, rheology

SELECT PUBLICATIONS AND PRESENTATIONS

Anteater, P. Article Name. *J. Am. Physics*. 2020, *126*, 454-455.

Anteater, P. Diller, F. J. Article Name, *manuscript in preparation*.

Diller, F.J. **Anteater, P**. Paper Name. Name of Conference, Boston, MA, May 28-June 1, 2021.
